

LA HealthDataNow!

Intro...

Welcome and thank you for your interest in joining the **LAHealthDataNow!** Query System. We are excited to have you as a **DPH Content Manager(s)** and are here to provide you with a step-by-step guide to achieve your goal—making your data query available to the public.

LAHealthDataNow! was developed in 2008 and had gradual transitions in the past years. The system is now equipped with new functions and features to design, upload, and maintain your Program's unique dataset and its respective query page.

Please note that developing a query page requires patience. The entire process cannot be done in just a few days, and you shouldn't haste yourself to complete the steps without a thorough assessing and testing of the system. The process will need a good amount of time for testing out the web/server connections, fixing any system or SAS generated bugs and for editing your SAS codes.

The following page displays a simple diagram illustrating the steps that are involved in developing your Program's Query Page.

A Quick Look at Steps to Creating a Program-Specific Query
